HOBBIES

Currently I do Thai kickboxing, specifically Muai Boran. I've been doing this for about a year with a friend of mine. I used to play tennis and football/soccer in High School.

I spend a lot of my freetime 'designing' in different digital mediums, currently my passion lies in making computer games, mostly pixel-art games (coding and drawing). A year ago I had an interest in website and logos, and a year before that I was fascinated by 3d modeling and photo manipulation.

I love hanging out with friends, occasionally going to parties and festivals. The parties mostly play electronic music but my taste is more varied.
